18	drum vocal (left back)	own mic
19	keyb vocal (right back)	own mic
20	intro tape/backing tracks	

Return channels:

1 Talkback

### The band brings:

- self-contained IEM rack
- 20 channel passive splitter
- all required mics and DI boxes
- own sound man

### Venue provides:

- mic stands and cables
- power cables
- FOH

The band uses wireless mics and in-ear monitoring on 821-865MHz band (3x Sennheiser SK-XSW, 2x Sennheiser EW300 IEM G3). The venue will coordinate RF use and acquire any required licenses.

Alternatively, the band can bring also their own FOH mixing console and the stage box. A pre-installed STP Ethernet cable between the FOH and stage would then be appreciated.
